About me

3 years of continuous experience in Fullstack software development: building both front-end and back-end for various web projects of scales and domains such as access control systems, e-commerce, rental applications, games, media, etc. Expert in full system development life cycle. I am dedicated to being a valuable contributor to every team I am a part of. I would be available for a 40+ hour workweek and can work with a flexible schedule. My preference is to work remotely, with the possibility of relocating.

Skills

Technical

HTML, CSS, JavaScript, Typescript, React, Next, Redux, ChakraUI, MUI, TailwindCSS, Node, Express, SQL, Golang, Storybook, MongoDB, Jest.

Additional

Git/Github, Slack, REST, GraphQL, WebSockets, Google Cloud, Scrum, CI/CD Jenkins, Jira, UI/UX Design, Confluence, Agile, TDD, Docker.

Soft

Communication, problem-solving, adaptability, teamwork, creativity, time management, critical thinking, continuous learning.

Experience

Hutchison Technologies
Software Engineer

September 2023 - May 2024
Dundee Scotland UK

- Designed and implemented the project's core functionalities
 - Developed and maintained APIs and cloud functions, facilitating seamless integration and scalability
 - Improved front-end performance by 20% through effective memoization techniques, advanced React strategies, and legacy code rework
 - Created responsive web pages using reusable UI components and custom elements, enhancing user experience across devices
 - Investigated and implemented external API integrations, which enabled new features and services
 - Enhanced UI/UX through user workflow optimization and improved overall usability
 - Developed and executed comprehensive test suites for both front-end and back-end components, increasing overall test coverage by 15%
-

Education

Bachelor of Computer Software Engineering, Kharkiv National University of Radio Electronics

Personal Projects (vladovcharenko.vercel.app)

- E-commerce Nike
React, Next.js, Stripe, Cloudinary
- Multiplayer Chess Game
React, Node.js, Typescript, Websockets
- Spotify
React, Spotify API, Redux, Next.js
- Discord
React, Node.js, Websockets, WebRTC
