Career Objectives

I'm keen on web development, like learning and implementing new technologies. I am eager to gain valuable experience from seasoned professionals while contributing to the growth and development of the company's products. I would like to develop complex web applications as well as UI/UX-focused projects. I will be available for a 40+ hour workweek, and able to work with a flexible schedule. I would like to work remotely, with the possibility to relocate to Manchester or London.

Skills

Technical
HTML, CSS, JavaScript, Typescript, React, Redux, MUI, Next, Node, Express, Socket.io, SQL, MongoDB.

Additional
Git/Github, REST, GraphQL, Tailwind, React-Router, JWT auth, Scrum, Responsive Web Design.

Languages
English C1, Ukrainian C2, Russian C2

Experience

- Developed several major personal projects, including implementations of popular applications such as Spotify, Discord, Chess.
- Proficient in using APIs and WebSockets, possess experience in creating custom APIs, as well as implementing JWT and session authentication.
- Took on the role of lead frontend developer in a 10-person team for the development of a Netflix project for my university course, with the Scrum methodology.
- Have experience building scalable serverless web applications on AWS.
- Coordinated all aspects of the software development lifecycle, including building, testing, and maintaining JavaScript code and performing comprehensive quality assurance testing
- Possess over two years of experience in React development.
- Software Engineer education background.

Education

Kharkiv National University of Radio Electronics 2020-2024, Software Engineer
